5. Eligible entries may be a single, dried manipulated gourd or multiple gourds manipulated together (inseparable).
 - a. Multiple manipulation techniques may be incorporated on an entry (knotted, coiled, molded, etching and so on)
 - b. If etching is used, it must be done while the gourd is green and living. Carving into the surface after the gourd has dried is not permitted.
 - c. Multiple manipulated entries can also be grown in different years, such as a green gourd manipulated around a previously grown & dried manipulated gourd.
6. While any method of gourd manipulation will be eligible to compete, innovation, new ideas and new techniques are appreciated.
7. The Degree of Difficulty is an important factor during the judging, so challenge yourself.
8. Green cleaned (outer skin removed before the gourd has dried) entries may score higher with respect to manipulation.
 - a. Note: Green cleaning carries a risk of the gourd drying too fast. This may result in shrinking, cracking and possible disintegration of the gourd. So be careful if you decide to use this process.
9. No added finish may be applied to the surface of the gourd, not even a clear coat or hardener.
10. All entrants must submit a completed Jim Story Award application.
